Interlocking brick block machine in kenya

1. fly ash brick making machine introduction:

BONA [fly ash brick making machine](#) is a mobile machine.It has larger productivity than the other small block machines.

This interlocking brick block machine in kenya is manufactured on the base of technical modifications to the original block shaping machines, that is changing the former one-time-vibration into twice-vibrations of molding core, So the block density becomes higher, shaping speed quicker and block strength more even ,This model of machine can be suitable to the customers who have any kinds of existing cement working sites.And the consumption pallets can be reduced.

2. JQM-6A laying moving [hollow brick machine](#) technical parameter

Technical parameters	
molding	6pcs/mould
hydraulic pressure	6-8MPa
frequency	3500/min
productivity	8000~10000pcs/day
hydraulic method	mould vibration
demold method	hydraulic
turning method	hydraulic
total power	12KW
total mass	2600kg
Molding cycle	20s
turning method	crushed stone, sand, cement, dust and coal fly ash, cinder, slag, gangue, gravel, perlite, and other industrial wastes.
total power	concrete blocks, solid/hollow/cellular masonry products, paving stones with or without face mix, garden and landscaping products, slabs, edgers, kerbstones, grass blocks, slope blocks, interlocking blocks, etc.
total mass	widely used in buildings, road pavers, squares, gardens, landscaping, city constructions, etc.
